

# GEOSPATIAL SYSTEMS

CENTRE FOR DOCTORAL TRAINING

## EPSRC Centre for Doctoral Training in Geospatial Systems Applications now open for entry in September 2023

A minimum of 11 fully-funded, four-year studentships available to join our 2023 cohort

Study at Newcastle University or the University of Nottingham

Graduate with both MRes (year 1) and PhD (year 4) qualifications

Our innovative four-year programme of research training in modern geospatial data science has been co-created by a team of world-leading academic and industry experts to deliver the next generation of geospatial scientists, engineers and practitioners

Conduct interdisciplinary PhD research into smart cities, infrastructure resilience, spatial mobility, energy systems, sustainable spatial planning, social inclusion, global challenges or other timely geospatial application areas.

We welcome applications from Home and International students from a range of backgrounds, including **Computing, Engineering, Geography, Geomatics, Mathematics** and related disciplines, and are fully committed to equality, diversity and inclusion to ensure fair opportunity for all.

Closing date Sunday 29<sup>th</sup> January 2023; on-line interviews will be held during Feb 2023
